```

WeatherAPI.py

```
import requests as reqs

def get(myLocation,APIKEY):

    apiURL = f"https://api.openweathermap.org/data/2.5/weather?q={myLocation}&appid={APIKEY}"

    responseJSON = (reqs.get(apiURL)).json()
```

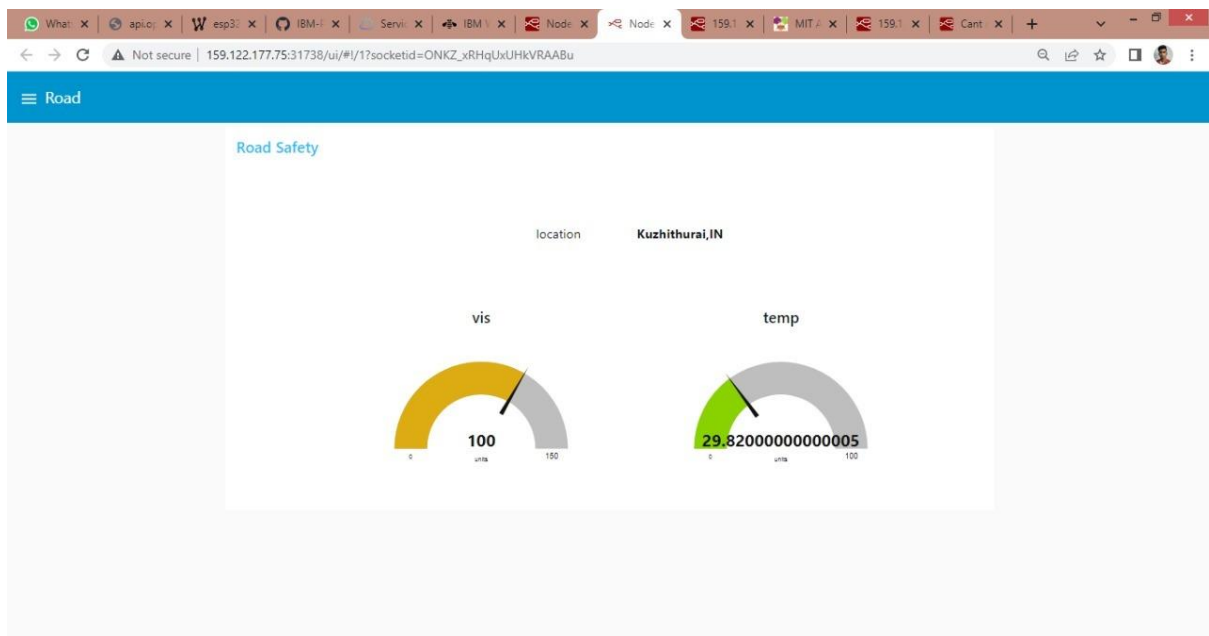

```

returnObject = {
    "temperature" : responseJSON['main']['temp'] - 273.15,
    "weather" : [responseJSON['weather'][_]['main'].lower() for _ in
range(len(responseJSON['weather']))],
    "visibility" : responseJSON['visibility']/100,
}

if("rain" in responseJSON):
    returnObject["rain"] = [responseJSON["rain"][key] for key in responseJSON["rain"]]

return(returnObject)

```

The screenshot shows the Node-RED web interface. On the left, a sidebar contains various widgets like button, dropdown, switch, slider, numeric, text input, date picker, colour picker, form, text, gauge, chart, audio out, notification, and ui control. The main workspace displays a flow with the following components:

- msg.payload** node (green) connected to a **location** function node (orange).
- location** function node connected to a **temp** function node (orange).
- temp** function node connected to a **visibility ui** node (teal).
- visibility ui** node connected to a **Location abc** node (teal).

The right sidebar shows the debug console with a log of messages. The messages are JSON objects containing temperature and location data, such as:

```
{ "temperature": 29.820000000000005, "visibility": 100, "location": "Kuzhithurai,IN" }
```

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes tabs for Browse, Action, Device Types, and Interfaces. The main content area displays details for a device named "Dev1", which is currently "Disconnected". The "Recent Events" tab is selected, showing a list of events with the following columns: Event, Value, Format, and Last Received.

Event	Value	Format	Last Received
status	{"temperature":29.820000000000005,"visibility":100,"location":"Kuzhithurai,IN"}	json	a few seconds ago
status	{"temperature":29.820000000000005,"visibility":100,"location":"Kuzhithurai,IN"}	json	a few seconds ago
status	{"temperature":29.820000000000005,"visibility":100,"location":"Kuzhithurai,IN"}	json	a few seconds ago
status	{"temperature":29.820000000000005,"visibility":100,"location":"Kuzhithurai,IN"}	json	a few seconds ago
status	{"temperature":29.820000000000005,"visibility":100,"location":"Kuzhithurai,IN"}	json	a few seconds ago

At the bottom of the dashboard, it indicates "0 Simulations running".
